

Grad-a-Gig®

Our DNA is delivering Software in UNKNOWN Domains

Client Registration

If you are a Startup or Business, having difficulty to deliver software product logs or want to grow and scale internationally (Go To Market) and need a partner who will deliver End to End working as an extension of your own office, Gradagig is there to help you. We are NOT greedy - our goal is to create opportunities providing dignified Knowledge Based Work for Persons with Disabilities who are otherwise socially excluded. Our other goal is to improve confidence among young students who are struggling with exorbitant tuition fees debt (US alone Student Debt is \$1.6+ trillion).

CERTIFIED SECURE

million Dollars) and do not have Job Security with so many large scale layoffs as well as technology disruptions (AI/ML/Robotic) and political uncertainties (Immigration and tariffs). The third goal is to engage with Carers who left the IT Career due to family challenges of caring for young or old, to be able to contribute at thier own pace.

Grad-a-Gig

Persons with Disabilities, Minorities, Women Registration

If you are a Person with Disability interested work from home (and have the necessary skills and tools) to work on Coding, Customer Service, Quality Assurance, Accounting or other jobs posted time to time please register with us your interest (sometimes it may require country specific language requirement posed by clients). Please note that we are not a recruitment agency and we do not charge clients nor the PwDs for this service. We are NOT a Training Service Provider and DO NOT charge PwDs for Training. This is purely as a Social Impact Service to include PwDs, Minorities and Women. The success of this program depends on Corporate Business Support and also availability matching skills. We will try our best to help the community and learn how to improve the overall social inclusion.

Grad-a-Gig

How?

Our DNA

Our team has delivered Software Projects in Unknown Domains using new Technologies with minimal resources using Agile Methodologies.

Trade Finance, Integrated Accounting, Jewellery ERP/POS (Retail), Garment/Toys Supply Chain, HR, Risk Management, SaaS Enablement, Artificial/Machine Learning, Computer Vision Integration, Go To Market CRM Automation, Customer Service and more.

We have worked with Student Interns, Women with small children working from home at their own pace and delivery Quality Results with strong foundation.

Combined with AI/ML techniques we are continually improving the delivery process and confident to add value to your organization.

Hence we are confident to offer "Pay On Delivery" ZERO RISK with Source Code Escrow.

If your team is not good at writing Business Scope, need not worry. Our team will help to nurture from Ideas to Implementation with our broad domain , technology and Project Management expertise.

Our team also has accumulated knowledge on Go To Market Strategies and We will help you from ideation to implementation with clear Key Performance Indicators (KPIs).

You pay ONLY if YOU get REVENUE Performance results.

We are NOT greedy. Our goal is to create opportunities providing Dignified Knowledge Based Work for Persons with Disabilities and Carers who are otherwise Socially Excluded and Students who are struggling with exorbitant international Tuition Fee expenses.

On the one hand Graduates and Experienced both unable to find jobs and on the other hand Startups and Corporates have many backlogs not completed on time. Even IT services companies with funds layoff employees in 10,000s. Persons with Disabilities in-spite of huge Government Budget do not complete University Degree and even if completed cannot get employed.

Our aim is to fill this gap between Education and Employment applying our team's combined experience to create opportunities equitably and ethically for everyone.

How can you support?

Take Action

Do a pilot Project with us with clear Business Scope and Acceptance Criteria.

Trust and Invest in us to hire the best team to achieve our goals.

If you are Skilled in AI/ML/Computer Vision Technology, Sales, Finance, Legal,
with Values aligned to Gradagig philosophy,
join us as Co-Founders (not employees) to grow together
to fulfil meaningful social impact and achieve your Ikigai - Sense of Purpose.

<https://www.linkedin.com/in/josy-chow-2b24b0319/>

Priya Srivastava - LLB

Priya aspires to be a Judge. She is keen to learn paralegal related work. She has excellent Communication Skills in English and Hindi as well as Computer Software.

<https://www.linkedin.com/in/priya-srivastava-0b48a61ab/>

Naresh Kumar - BCom (Computers)

Naresh is pursuing his MBA at IIT Madras. He is keen to learn Marketing and apply his HTML, CSS coding. He also teaches visually impaired students.

<https://www.linkedin.com/in/naresh-kumar-p-493851202/>

Contact them Directly or Via Grad-a-Gig

After contacting 200+ Corporate HR/Law Firms , till date I have not been able to get them any sustainable work from home jobs.

Constraints are they prefer not go to an office (stressful), they can only work for 2 to 4 hours (upto individual to decide) (Some give excuse as a Risk (fear cannot terminate once engaged, some give excuse Employee Insurance cannot be arranged, some give excuse no experience, some expect to work long hours - if there is a will there is a way - just lack the Willingness to try - how can some one get 'experience' if no one want to coach? By NOT employing them, only the Corporates are losers of Loyal Intelligent Dedicated employees .

Social Challenge of Speech/Hearing Impairment

Problem Statement

30 million Children have severe Speech and Hearing impairment globally and 80% of them do not get access to quality education. **Only 2% can learn Sign Language.** There **300+ different Sign Languages** with **5,000 to 200,000 vocabularies**. Not sure how the Language (Mother Tongue), Environment, Culture affect the learning.

There are many **AI/Computer Vision research** going on for many years. But **not much adoption** in the mainstream community especially in low income countries where the problem is acute. Some Research estimate an **USD980bn economic loss** (cost) to the society (2019 estimate). **WHO estimates 700 million** persons will be affected **by 2050**.

As per CUHK report , **Speech therapists are in short supply** globally. In **the US** the ratio of speech therapists to population is **1:2,290**. In **Hong Kong**, the ratio is **1:20,000**. In mainland **China, it is 1:1.3 million**.

<https://www.iso.cuhk.edu.hk/english/publications/CUHKUPDates/article.aspx?articleid=2354>

Our research is to make a small dent and how we can add value to this huge problem. This requires real life data collection, applying AI/Machine Learning to categorize and pave way for an inclusive society.

AI/Computer Vision Solution to Enhance Speech

Proposed Solution

Globally many researchers are working on solutions to tackle this huge problem. Our goal is to be able to make an impact for small group of Target Persons with Speech/Hearing Impairment may be begin with Tamil and Cantonese language in the age group of 15 to 25 (to be concluded) to enable them Learn how to communicate, Upskill and enable them to deliver Knowledge Based Gigs , Earn sustainably and live with Dignity and Self-reliance.

We hope they can be next generation entrepreneurs creating employment for many more.

Cooperative Business Model

Inspired by AMUL

All contributors to the growth of Grad a Gig will be rewarded equitably. This will be meaningful only if the Revenue & Profits can grow Multiple X sustainably Year on Year.

<https://www.amul.com/m/about-us>

Core Values

Cohesive Team

Team must be Cohesive to grow together. Co-founders need to be role-model to hire and train others to ensure the values are strong DNA of the organization.

Dream Big

Gradagig will help you achieve

Every startup entrepreneur has a **big dream**. We believe this is very much essential for society to progress. But unfortunately NOT all dreams turn into reality.

There are **150 million startups in 2025 (50 million new ones** every year)
90% of them fail

With cumulative experience in launching from Concept to Scale, our team will support you even if you are an one-person band.

Email us to learn more.

We want you to succeed and avoid certain mistakes we learnt by trial and error.

No strings attached. We are hear to listen.

No idea is bad. It is the execution which need expertise.

<https://www.demandsage.com/startup-statistics/>

About us

Our Value Proposition

Our Vision is to provide
End to End Solution Delivery
for
Businesses and Startups
with **Software Product Backlog** and
Go-To-Market support

We are NOT an Offshore Outsourcer

We are NOT a Recruitment Agent

Knowledge Based Gig

Grad-a-gig's mission is to
reduce the gap
between
Education and Employment
using

**AI to match
students with
Potential Project Gigs
and
Social Impact Investors
to support their Tuition Expenses**

Social Impact

Our **mission** is also
To include
Persons with Disabilities
in getting dignified knowledge work

To include
Minorities and
Women Who can Code
enabling them contribute
at their own pace enhancing
work life balance

Our Values

Entrepreneurial Spirit

It all started in 1991 with Roger (at age 27) started the **Entrepreneurial journey with COSMIC**. He did not know PC programming, he had no Business experience, he had no Accounting knowledge, yet he

learnt programming, he acquired accounting knowledge, and after over 7 months of hearing only

'No's grew from

home office to 40+ people organization and

first Million Dollar project in 1998.

He sold that business to then NYSE listed Silverline Technologies in 2000.

That **entrepreneurial spirit of creating new business, new market is still alive** and thus Gradagig

is born at age 59. More on that story <https://www.linkedin.com/pulse/happy-thanksgiving-celebrating-30th-anniversary-rajagopalant/>

Customer Centric

Our strong belief is that any business can scale multiple X growth **only if the Customers are willing to pay for the Product or Services offered.**

However we also recognize that an

idea alone is not enough,

but businesses need a **cohesive team** with necessary skills to create unique value and necessary funding to implement the strategy. Hence **Customer Centricity** at Grad-a-gig

applies to all the stakeholders,

Customers, Students, Co-founders, Employees, Social Impact Investors, Venture Capitalists.

Mutual respect

is one of the founding principles of Grad-a-gig.

Can do Attitude

Every business face many different type of challenges all the time. At Grad-a-gig we want to build the **team who are not afraid of taking risks** (calculated) and **not afraid of failures** (willing to learn from mistakes).

We follow **Agile and PDCA methodologies.**

Most of the time we work with many uncertainties, ambiguities and hence '**Can do**' **positive attitude** is very crucial for our success. Most of the time we will tread on paths no one has adventured - off-course within our own boundaries outlined by our core philosophy of **Democratising Student Loan** and **Including Persons with Disabilities, Minorities and Women.**

Problem Solving

We are here to **help Customers solve their pain points** with confidence at mutually beneficial win-win ways. Based on our collective experiences, in spite of many technological advancements like AI/ML and others, many Corporates (big and small) and new Startups face many challenges in delivering their

Core Product/Services R&D and Go To Market Strategy

using latest Digital technologies to increase their Profits and Market Share. With our many years of combined experiences we believe we have an Unique Value Proposition to deliver End to End solution to help our customers grow faster and efficiently at mutually agreed timeframe, most importantly at a fixed cost.

Our value

Performance based R&D Engineering @speed

Transparency

At Grad-a-gig we aspire to build a team which is cohesive, **transparent in communication** without any hidden agenda- keep up mutually agreed time (basic etiquette), discipline, keep promises and open for constructive criticism. Since our initial focus is in Software R&D projects, we aim to work as a **team** inclusively without Ego

Treating everyone with mutual respect.

We also need team who are **Quality** Conscious (Write Clean Code/Document to reduce Rework and have better Maintainability) and

Doing the Right thing first time and everytime, Aiming High (to be the Best),

Curious to **learn** all aspects of the business and Apply **Best practices** from the Industry,

Innovative (Continually looking for ways to **improve iteratively enjoying the process**) with **high level of Integrity**.

Cooperative

AMUL is in the business of Dairy products from 1946 and growing exponentially using its **Cooperative**

Business Model with Lean administrative costs

benefitting both Consumer of Milk (best quality and low prices without Middle men) and also the Producers (Millions of farmers in the rural villages) getting all the latest technology support to improve their quality of life and the livestock

<https://businessmodelanalyst.com/amul-business-model/>

In similar fashion, Grad-a-gig wish to give clients

the best quality to solutions at affordable cost and benefit the

Students in reducing their debt burdens doing gigs at better than minimum wages, at their own

pace and also **creating social impact**

by actively and consciously

including Persons with Disability, Minorities, and Women for an inclusive society.
